

Warehouse & Distribution Center IT Readiness Checklist

Cabling and camera planning for a new or expanding facility.

- ☐ **Dock door camera coverage**
The highest-risk zone for loss and liability on the whole floor.
- ☐ **High-value SKU / secured-cage coverage**
Cameras where the expensive or easily-resold inventory actually sits.
- ☐ **Perimeter coverage**
Fencing, employee/visitor parking, dumpster and exterior areas.
- ☐ **Footage retention planning**
NVR storage matched to how long you actually need to investigate an incident.
- ☐ **Cabling planned for rack layout**
Not just walls — warehouses change layout more often than offices do.
- ☐ **Camera network segmentation**
Kept separate from warehouse management / inventory systems.
- ☐ **Forklift aisle coverage**
Safety documentation, not just theft prevention.
